

Advanced Technologies for Methane Abatement

Reverse Trade Mission

Algeria | Egypt | Libya

Business Briefing | May 24, 2023 | 8:00 AM - 2:30 PM CDT | Houston, TX

Meet Energy Decision-Makers from Algeria, Egypt, Libya

Senior energy sector decision-makers from Algeria, Egypt, and Libya seek to connect with key U.S.-based companies, manufacturers and solution providers to procure advanced methane leak detection and abatement technologies, services, and discuss best practices in methane abatement.

The U.S. visit, hosted by the U.S. Trade and Development Agency (USTDA), will include a Business Briefing on May 24, 2023 in Houston, TX. As a participating U.S. company, you will have the opportunity to meet the delegates, provide a brief overview of your solutions, and gain insight into specific near-term commercial opportunities to support methane abatement projects in the MENA Region.

BACKGROUND

Methane is a powerful but short-lived climate pollutant that accounts for about half of the net rise in global average temperature since the pre-industrial era. During COP 27 in Egypt, it was announced that more than 150 countries have joined the Global Methane Pledge (GMP), representing 70% of global gross national product. 50+ GMP participating countries have developed national methane abatement action plans and many more will follow.

Participating GMP countries agree to take voluntary actions to contribute to a collective effort to reduce global methane emissions at least 30 percent from 2020 levels by 2030. The delegation's methane abatement action plans and initiatives include the procurement of advanced U.S. technologies, services and best practices to address methane leak detection and repair (LDAR), emission measurement, tracking and other abatement solutions in the oil and gas sector.

The delegation is comprised of high-level MENA region decision-makers representing the energy sector from the countries of Algeria, Egypt, and Libya who are interested in procuring U.S. technology, and services.

ABOUT USTDA

The U.S. Trade and Development Agency helps companies create U.S. jobs through the export of U.S. goods and services for priority infrastructure projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding projects preparation and partnership building activities that develop sustainable infrastructure and foster economic growth in partner countries.

Attendance at this event is limited to U.S. individuals, U.S. firms, or U.S. consultants as defined by USTDA's Nationality Source and Origin Requirements available on USTDA's website at <http://www.ustda.gov/>.

WHY YOU SHOULD ATTEND

- Gain market intelligence and learn about upcoming procurement opportunities.
- One-on-one meetings with key decision-makers to establish new business partnerships.
- Learn about near-term methane abatement action plans and projects of participating countries.

BUSINESS OPPORTUNITIES

Supporting MENA region methane action plans and infrastructure projects by delivering:

- Methane leak detection and repair (LDAR) technology;
- Advanced measurement and tracking technology;
- Advanced methane capture and repurposing technology to reduce methane flaring and venting;
- Project management, and best practices.
