

Advanced Technologies for Methane Abatement Reverse Trade Mission

Argentina | Brazil | Ecuador | Mexico

Business Briefing | December 13, 2023 | 8:00 AM - 4:00 PM CST | Houston, TX

Meet Energy Decision-Makers from Argentina, Brazil, Ecuador, and Mexico

Senior energy sector decision-makers from Argentina, Brazil, Ecuador, and Mexico seek to connect with U.S.-based companies, manufacturers and solution providers to procure advanced methane leak detection and abatement technologies and services and discuss best practices in methane abatement.

The U.S. Trade and Development Agency (USTDA) will host a Business Briefing on December 13, 2023 in Houston, Texas. Participants will be able to meet delegates one-on-one, share overviews of their solutions, and gain insight into near-term commercial opportunities to support methane abatement projects in Latin America.

BACKGROUND

There is global consensus that reducing methane gas emissions is the fastest way to slow the pace of global warming. Argentina and Mexico were among the original nine supporters of the Global Methane Pledge (GMP), which has since been joined by both Brazil and Ecuador. Participating GMP countries agree to take voluntary actions to contribute to a collective effort to reduce global methane emissions at least 30% from 2020 levels by 2030.

This delegation comprises high-level decision-makers from these countries who are interested in procuring advanced U.S. technologies, services and best practices to advance their methane abatement action plans. Particular interests include methane leak detection and repair, fugitive emission measurement and tracking and abatement.

ABOUT USTDA

The U.S. Trade and Development Agency helps companies create U.S. jobs through the export of U.S. goods and services for priority infrastructure projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding projects preparation and partnership building activities that develop sustainable infrastructure and foster economic growth in partner countries.

Attendance at this event is limited to U.S. individuals, U.S. firms, or U.S. consultants as defined by USTDA's Nationality Source and Origin Requirements available on USTDA's website at <http://www.ustda.gov/>.

WHY YOU SHOULD ATTEND

- Gain market intelligence and learn about upcoming procurement opportunities.
- Meet one-on-one with key decision-makers to establish new business partnerships.
- Learn about near-term methane abatement action plans and projects of participating countries.

BUSINESS OPPORTUNITIES

- Methane leak detection and repair technology
- Advanced measurement and tracking technology
- Advanced methane capture and repurposing technology to reduce methane flaring and venting
- Project management and best practices
